The Genuine Alternative

For over 38 years Powerdown has developed a comprehensive range of shock absorbers, with no compromises made on quality and performance. Powerdown has expanded its offering to encompass a vast range of truck, trailer, bus and light commercial vehicle shock absorbers, designed specifically for Australian roads, loads and conditions. Powerdown's range of heavy duty shock absorbers have been engineered to meet or even exceed OEM design standards, making Powerdown the genuine aftermarket alternative.

In February 2020 Powerdown was acquired by Filpro Automotive Australia. Under the acquisition agreement, Powerdown will continue to manufacture and/or distribute all current Powerdown branded OEM and aftermarket products for trucks, heavy commercial trailers, buses and light commercial vehicles; and RAW 4x4 branded products for four-wheel drive vehicles.

Filpro Automotive is a leading supplier of automotive aftermarket products, with established warehousing and distribution networks within New Zealand and Australia. Filpro are partnered with market leading brands and world class manufacturers, delivering a range of industry-leading products including FRAM Filters, Safeline Brakes, Indy Oil, Prestone, Redex, Simoniz and Holts products. The Group's manufacturing capabilities and extensive distribution network will greatly expand the availability of Powerdown's suspension products to customers in Australia, New Zealand, Sub-Saharan Africa, the middle East and the US.

Combined with the vast resources available to Filpro Automotive, Powerdown brings over 38 years' experience in the heavy vehicle industry. This exciting development will benefit both Powerdown and Filpro, along with its customers, through expansion and innovation.

Above: Powerdown head office warehouse in Beresfield NSW, stocks our complete range of Powerdown and RAW 4x4 products alongside the addition of FRAM filters, Prestone coolants, Holts workshop consumables, Simoniz car care and Redex fuel additives.

AUSTRALIAN FIRST DEVELOPED BY POWERDOWN

As part of our mission to be a socially responsible brand, Powerdown believes that we have found a solution for transport fleets to make their way to a greener, more sustainable future.

Enveero is an Australian first in its field; providing an environmentally conscious solution without the need for compromising on product performance. Enveero is a synthesised, ultra high performance, environmentally friendly shock absorber fluid designed and developed in Australia by Powerdown.

ULTRA HIGH PERFORMANCE Enveero has a high viscosity index combined with excellent heat conductivity, delivering optimal damper performance in hot and cold conditions. Enveero has excellent shear stability providing better mechanical protection when placed under high stress; this is due to the longer synthesised hydrocarbon molecules which forms a stronger chain. This leads to less mechanical wear on the damper valving components, giving them a longer life.

DESIGNED FOR AUSTRALIAN CONDITIONS A high flash point, exceeding 185°C (higher than that of traditional shock absorber oils), with anti-foaming properties, reduces fade or loss of damping, thus maintaining vehicle control even on the warmest summer days on Australia's harshest roads, increasing safety and minimising damper related tyre wear.

ENVIRONMENTALLY FRIENDLY Enveero is produced using sustainable and renewable sources. It is also biodegradable and recyclable, helping to minimise negative impacts on the environment.

SUSTAINABLE AND RENEWABLE Enveero was developed from sustainable plant-based resources which are renewable. Plant-based resources have a distinctly low carbon footprint, the final blend used for Enveero has a non-crude based content greater than 85%.

BIODEGRADABLE The ingredients in Enveero are highly biodegradable; measured by its ability to decompose by naturally occurring bacteria or other living organisms in the environment; the quicker it decomposes, the lower the environmental impact resulting in less pollution. Testing has shown that Enveero reaches biodegradation greater than 60% in 28 days.

RECYCLABLE Enveero is completely recyclable, and can be recycled in combination with waste mineral oils, making Enveero an option in closed loop recycling as it can be reused or repurposed. At the time of printing this document, approximately only 10% of all oils used in Australia are made from recycled product, whilst the remaining 90% are imported.

Shock Absorbers

Powerdown shock absorbers are designed specifically to cope with the harsh Australian environment and road conditions. Looking to the future, Powerdown are constantly looking for ways to improve their shock absorber technology.

Heavy Truck, Trailer, Bus

LARGE BORE SIZES
38, 41 & 45mm

INCREASED BODY SIZE

Vastly improving heat dissipation, helps operate cooler over long distances & constant high speeds.

UPGRADED DAMPING PERFORMANCE

For Australian roads & higher horse power engines.

LONG LIFE HIGH TEMPERATURE SEALS & SEMI-SYNTHETIC FLUID

Helps withstand higher operating temperatures for longer, outlasting standard oils & rubber seals.

360° ARC WELDED END MOUNTS & ONE PIECE EYE RINGS

Increased strength & durability.

HYDRAULIC STOP/ RECOIL CUT OFF

Cushions the piston at the end of its stroke, reducing impact. Helps increase longevity & reduces fatigue on shock absorbers & other suspension components.

DU BUSH IN ROD GUIDE

Helps reduce friction & wear when side loading occurs.

Heavy Trailer

LARGE BORE SIZES
45mm

LOW PRESSURE GAS

Helps keep the unit operating at lower temperatures.

ADVANCED LOW FRICTION SEALS

For increased seal life keeping the dust out & the oil in, for longer shock absorber life.

INCREASED BODY SIZE

For extra oil capacity to help with cooling.

EXCLUSIVE ON VEHICLE RIDE HEIGHT INDICATOR

Strategically placed on the body of the shock to indicate operating position of the shock absorber in relation to ride height.

HIGH TENSILE STRENGTH

HYDRAULIC STOP/ RECOIL CUT OFF

Cushions the piston at the end of its stroke, reducing impact. Helps increase longevity & reduces fatigue on shock absorbers & other suspension components.

DU BUSH IN ROD GUIDE

Helps reduce friction & wear when side loading occurs.

Medium/Heavy Truck, Bus

LARGE BORE SIZE
35, 38 & 45mm

INCREASED OIL CAPACITY

Improving shock absorbers ability to maintain damping control & operate cooler under hard working conditions.

UPGRADED DAMPING PERFORMANCE

For Australian roads that can vary from a highway to narrow bitumen in a matter of a few kilometres.

REINFORCED WELDS

End mounts welded for secure fitment to vehicles.

VARIOUS BODY SIZES

Designed for extra oil capacity & to fit into confined spaces.

Light Truck and Van

BORE SIZE
32 & 35mm

HEAVY DUTY CONSTRUCTION

Help withstand harsh working conditions.

UPGRADED DAMPING PERFORMANCE

For Australian roads that can vary from a highway to narrow bitumen in a matter of a few kilometres.

SELF ALIGNING RUBBER BUSHES

For easy fitment.

360° ARC WELDED END MOUNTS & ONE PIECE EYE RINGS

Increased strength & durability.

INCREASED OIL CAPACITY

Improving shock absorbers ability to maintain damping control & operate cooler under hard working conditions.

Online PartsFinder

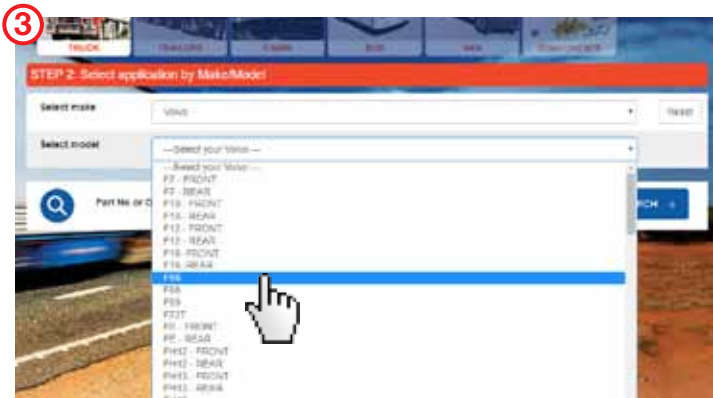

Did you know that the Powerdown catalogue can be accessed online?

Visit www.powerdown.com.au and click on the ONLINE PARTS FINDER in the menu

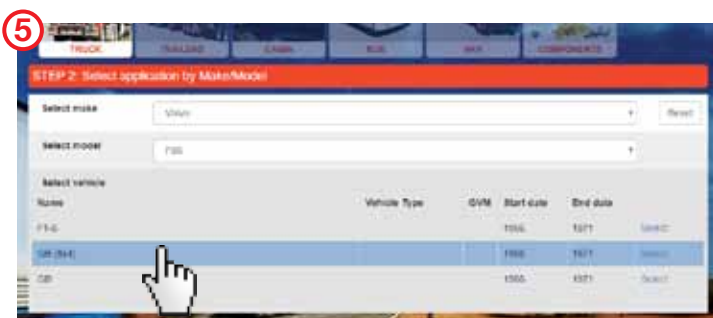

Click on the range you want to view: Truck, Trailer, Cabin, Bus, Van, Components

Select the make you are interested in from the "Select make" drop down menu

Select the model you are interested in from the "Select model" drop down menu

Select the vehicle you are interested in from the list that appears

All Powerdown parts available for this vehicle will appear listed on the screen

Quick Search OEM or Powerdown part numbers: Simply scroll to the bottom of the web page and enter the number in the search field and press the SEARCH button, it's that simple.

Suspension Components

Polyurethane Bushes

Powerdown bushes are developed from high-quality urethane elastomers with a capacity to bear high loads in tension and compression.

This combined with a high resistance level to oils, greases and solvents, and the ability to perform in temperatures from -40°C to +100°C, gives them greater durability and longer life than other bushes.

SHOCK ABSORBER BUSHES

TRAILER BUSHES

APPLICATION SPECIFIC BUSHES

Height Control Valves

Height control valves (HCV's) are one of the most important working components of an air suspension, providing a responsive ride and a stable platform for your load. If the air in your supply tank cannot get to your air springs quick enough, the many benefits of using an air suspension are lost.

Powerdown proudly distribute Hadley and Ridewell height control valves.

INSTANT AND DELAYED RESPONSE VALVES

CABIN VALVES

HADLEY SMARTVALVE: ELECTRONIC HEIGHT CONTROL SYSTEMS

Cab Suspension

Road related vibration and feedback can be transferred through the cab and steering wheel, ultimately leading to increased levels of driver fatigue.

Powerdown have designed and developed a range of enhanced steering and cab dampers to absorb the vibration, improving overall comfort levels.

CAB DAMPERS

STEERING DAMPERS AND RETRO FIT KITS

CABIN AIR BAGS

Holts® Professional Range

For over 100 years Holts have been producing quality workshop consumables. Holts Professional products are specifically designed to assist workshop professionals with fast acting formulas, that are easy to apply, with powerful cleaning capabilities.

360° spray action nozzle allows for aerosol to spray in all directions for ease of use in any position

ORDER NOW THROUGH YOUR POWERDOWN ACCOUNT

Prestone Command® heavy duty Coolants and 2 in 1 Flush & Degreaser are specifically developed for heavy duty engines.

Prestone Command® extended life Coolants is Nitrite free with Corguard to inhibit corrosion. With a ON-2EH (OAT) Formulation, they have 1,600,000 kms or 20,000 hrs of service life.

It is compatible with ANY nitrite free HD Organic Acid Technology (OAT) coolant in ANY diesel-powered commercial vehicle engine or stationary engine.

Prestone Command® heavy duty Coolants meet or exceed the performance requirements for all HD OEMs, including Cummins and Detroit Diesel.

CAB HEIGHT CONTROL VALVES Refer HCV Section in this catalogue

PART NUMBER: 6330BFAC05

CAB & R.V COMPACT
HEIGHT CONTROL VALVE

- Instant Response Valve
- 1/4" Push to connect ports
- Brackets & 1247423C011 350mm link kit

PART NUMBER: 600

CAB & R.V COMPACT
HEIGHT CONTROL VALVE

- Instant Response Valve with 3/8" ports
- Includes 2 optional length actuating arms & mounting brackets

PART NUMBER: 450

- Delayed Response Valve
- 3/8" airline ports
- Universal replacement valve
- Includes multiple application brackets
- Available with ports up or down

POWERDOWN SHOCK ABSORBER BUSHES

Developed from high-quality urethane elastomers

Capacity to bear high loads in tension & compression

Greater durability and longer life than other bushes

High resistance level to oils, greases & solvents

Performs in temperatures from -40°C to +100°C

CAD configured to fine tolerances for better fitment

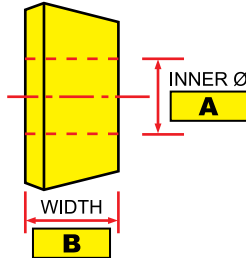

Rigorously R & D tested in the harshest conditions

HADLEY HO1501UD REPLACES BARKSDALE VALVE

HADLEY HO1500PUD REPLACES HALDEX VALVE

HADLEY HO1500UD REPLACES BARKSDALE VALVE

HADLEY®**SmartValve™**

Until now, electronic height control valves were an expensive option available on new European trucks. Hadley's all new Smart Valve has changed the rules of the game, where now an electronic valve can be fitted as an aftermarket upgrade to your truck.

With multiple lever lengths and orientations, along with several valve mounting options in a compact design, the Hadley Smart Valve will save you time in and out of the cab, reduced strain on your back and lessen the damage to your valuable trailer equipment.

THE HADLEY SMART VALVE IS THE SOLUTION TO YOUR HEIGHT CONTROL VALVE PROBLEMS.

TRAILER COUPLING MADE FASTER, EASIER AND SAFER

ELECTRONIC HEIGHT CONTROL SYSTEM**LESS TIME WAITING FOR AIR PRESSURE TO BUILD UP**

With fast efficient use of air and no dead band inaccuracies the Smart Valve will fill the airbags faster than a standard mechanical valve. Raise above ride height function – couple the truck and trailer by simply raising the truck over ride height with an in cab switch, lifting the trailer and load.

REDUCED LANDING LEG DAMAGE

Coupling to an off centre trailer, the king pin and trailer have to shift in order to align with the 5th wheel, causing the landing gear to move with the weight of the trailer bearing down on it. With the Smart Valve simply raise above ride height enabling the landing gear to move freely when backing up and centering.

TAKE THE STRAIN OFF YOUR BACK

With the weight of the trailer fully resting on the landing gear and suspension, the effort used in winding up the landing gear can result in back strain and injuries. When the Smart Valve is installed on the truck, lift above ride height and feel the difference.

STEERING DAMPERS

HOW TO MEASURE YOUR VEHICLE FOR FITMENT OF A STEERING DAMPER

STEP 1

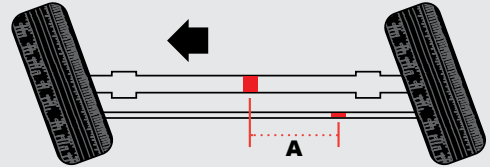

Measure the centre of the axle and the Tie Rod and mark both with chalk.

NOTE: Measure when vehicle unloaded and at kerb height.

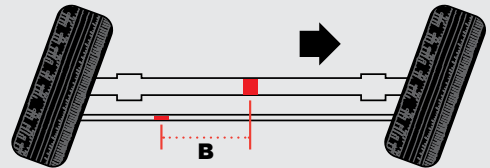

STEP 2

Measure from chalk mark on the axle to chalk mark on the Tie Rod at full lock to the left. "A" See drawing.

STEP 3

Repeat this with full lock to the right. "B" See drawing.

STEP 4

Add both measurements together, this shall provide the stroke of the damper required.

NOTE: Allow up to 20mm extra for each measurement

Length A + Length B

**STROKE OF
STEERING DAMPER**

HADLEY® Air Horns

The Sound of America

Hadley are one of the largest OEM suppliers of air horns in North America and their products can already be found in Australia and New Zealand on many trucks that have been directly fitted in the factory.

Powerdown officially distribute Hadley horns, lanyards and elbow kits as an aftermarket product range.

The Hadley air horns are manufactured from quality steel or aluminium and are finished off with chrome or an anodized finish. The following are a selection of horns & accessories that are already available from Powerdown.

SINGLE HORN ASSEMBLIES

HADLEY® Special Order Products

BULLY HORNS AND KITS

The Hadley Bully Series Air Horn offers the traditional "Hadley Sound", a crystal clear, characteristic note that can be heard for up to a mile. This hallmark Hi/Lo Tone comes from the exclusive sound chamber and the use of offset trumpets.

EMERGENCY eTone AIR HORNS

Emergency eTone horns are available in a variety of finishes including matte black, chrome, or anodized aluminum. Hadley offer complete installation kits as well as individual parts.

MOTORCOACH MIRRORS

The exclusive Hadley wire chase design is available on select exterior mirrors and the revolutionary 9" x 13" head design provides an additional 2" of curb height clearance on low floor transit buses. Hadley's wide angle convex provides a 25% gain in viewing area vs. conventional convex mirrors!

Hadley's selection of mirrors allow you to choose virtually any configuration possible with the widest assortment of options!

RV AND SPECIALTY VEHICLE MIRRORS

Hadley has a large selection of mirror options especially designed for RV and Specialty Vehicles.

To find the right mirror for your unit contact Powerdown for more information.

Cat's Eye®

Tyre Pressure Maintenance System

WITH JUST A GLANCE, DUAL TYRE PRESSURES CAN BE CHECKED ON EFFICIENT WALK-AROUNDS WITH THE CAT'S EYE® TYRE PRESSURE MAINTENANCE SYSTEM.

KIT PART NO.	VEHICLE TYRE PRESSURE	DESCRIPTION
6090-AB00	90 PSI	Each kit contains: 2 x Cat's Eye gauges that fit one axle.
6100-AB00	100 PSI	
6085-BB00	85 PSI	Each kit contains: 4 x Cat's Eye gauges that fit two axles.
6100-BB00	100 PSI	

The Cat's Eye makes it easy to see if your tyres are underinflated. This system attaches to the dual's hub or lug bolt and allows air transfer from one tyre to the other. Its single airing point fills both tyres at once, making the job quick, clean and easy. With just a glance, you'll instantly see changes in tyre pressure.

The bright yellow "eye" of the Cat's Eye, opens up slightly if dual tyre pressure falls 10-15% below the recommended pressure setting. The internal check valve will prevent the good tyre from going flat in the case of a tyre blowout or a broken pressure hose.

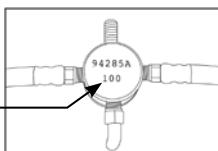

Cat's Eye is available with stainless steel braided hoses in lengths of 305mm, 356mm or standard 406mm.

INSTALLATION INSTRUCTIONS

STEP 1:

Fill out and return the warranty card included with your Cat's Eye® system.

Confirm that the pressure rating of the Cat's Eye is correct for your application.

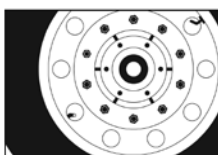

STEP 2:

Check the valve stems to insure that:

- They are located 180° apart.
- Threads are clean and in good condition.
- Valve core is working properly and free of debris.
- No extenders are being used.

If there is any damage to the valve stems or valve cores, repair or replace as necessary.

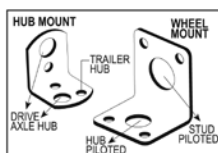

STEP 3:

Inflate both tyres before installing the Cat's Eye.

STEP 4:

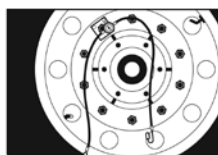

Select the correct bracket for your wheel or hub installation.

STEP 5:

Select an appropriate mounting point, either lug or hub bolt. Position the straight hose end to the inside tyre and the bent hose end to the outside tyre stem.

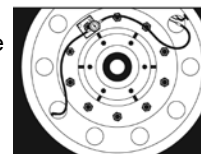

- For wheel mounting, attach the bracket to the selected lug bolt, and then attach the Cat's Eye gauge to the bracket.
- For hub mounting, attach the Cat's Eye gauge to the bracket, and then attach the bracket to the selected hub bolt.

STEP 6:

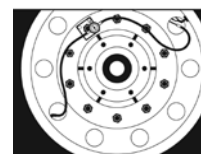

Attach the straight hose end to the inside tyre by threading the hose fitting on the tyre stem. Failure to connect the inside tyre first will cause air to release from both tyres.

Finger tighten the fittings until snug. Leaking sound should stop noticeably before a wrench is necessary.

STEP 7:

Attach the bent hose end to the outside tyre in the same manner. Give each fitting a half turn with a 1/2" spanner. Do not overtighten! Overtightening can cause permanent seal damage.

STEP 8:

Inflate tyres through the Cat's Eye valve stem until yellow "eye" closes. Confirm the pressure with an accurate tyre pressure gauge.

STEP 9:

Check for leaks in the system by bubble testing.

STEP 10:

Install the included Cat's Eye frame decal on the vehicle to assist operators in understanding gauge indications.

HOW TO READ THE GAUGE

When the "eye" is completely closed, the tyres are within the recommended pressure range and are equalized.

As pressure begins to drop the "eye" opens, indicating a slow leak or severe underinflation.

NORMAL PRESSURE

SLOW LEAK

SEVERE AIR LOSS

Supersessions Listing

The team at Powerdown continue to work hard to provide the best shock absorber designs and consolidate our product lines. Below is a list of the latest supersessions that have been rolled out in the Powerdown catalogue since the last print edition published in 2014.

Terms of Trade

Please note the following are excerpts from the Powerdown Terms of Trade Document, these terms can be updated at any time without notice. To access the most current & complete document visit <https://powerdown.com.au/terms-of-trade/>.

COPYRIGHT

All rights reserved. The Copyright Material or any part thereof cannot be printed, reproduced, altered or otherwise used without written authorization from the Supplier.

(See "Item 31" of Powerdown Terms of Trade)

In this Agreement "Copyright Material" means & includes (without limitation) logos & marks relating or referring to the Supplier's brands or products or brands or products to which the Supplier is otherwise entitled to promote appearing in Catalogues or on the Supplier's website, including Powerdown, Enveero, Adjustable T, Cool Cell, SuperShock, RoadTrain, Powerdown LTS, TuffYellow, RAW 4x4, RAW NitroMax, RAW Nitro, RAW Predator, RAW BigBore, RAW RFX, Ridewell Suspensions & Hadley.

(See "Para 4" of Powerdown Terms of Trade)

INTELLECTUAL PROPERTY

For the purposes of this Agreement, "Intellectual Property Rights" means copyright, trademark, design, patent, and any other rights whether or not they are registered or registrable, relevant to, among other things, the textual, graphical, audio and other information, content, data or material used by the Supplier in respect to this Agreement.

(See "Item 32/32.1, 32.2, 32.3, 32.4, 32.5" of Powerdown Terms of Trade)

DISCLAIMER

Manufacturers names, part numbers, symbols or other references appearing in the Catalogues are used for reference for order of goods only. All information supplied was correct, to the best of the Supplier's knowledge, at the time of publication and is subject to change without notice at any time at the discretion of the Supplier.

(See "Item 33" of Powerdown Terms of Trade)

PLACEMENT OF ORDERS AND VARIATIONS

The Purchaser may order the goods from the Supplier in writing, by phone, email, facsimile, Supplier-hosted on-line or web-based ordering (if the Supplier has this facility) or other electronic communication or telecommunication acceptable to the Supplier (which includes without limitation purchase orders, the acceptance by the Purchaser of a quotation, proposal or variation prepared by the Supplier) ("orders"). Upon placement of the order, the Purchaser will be bound to proceed with the purchase of the goods at a price confirmed by the Supplier.

(See "Item 9/9.1" of Powerdown Terms of Trade)

The Supplier will notify the Purchaser if goods ordered cannot be supplied ex stock at time of the order, or within a reasonable period of time following the order, and will be placed on back order and supplied once goods are available to the Supplier. Goods will remain on back order for a period of 60 days from placement of the original order and will then be deemed to lapse ("lapsed goods"). The Purchaser must liaise with the Supplier to re-order the lapsed goods to ensure delivery. Until the Purchaser re-orders the lapsed goods the Supplier is under no obligation to supply or deliver the lapsed goods.

(See "Item 9/9.2" of Powerdown Terms of Trade)

DELIVERY AND FREIGHT

Deliveries shall be made during normal working hours and will be at the sole cost and risk of the Purchaser. Deliveries required outside normal working hours will only be delivered upon the written request of the Purchaser, and all additional charges will be the sole responsibility of the Purchaser.

(See "Item 13/13.1" of Powerdown Terms of Trade)

The Purchaser may, acting reasonably, nominate and arrange for a delivery or freight carrier or provider, including an air freight courier, to uplift their order from the Supplier on its behalf. The Purchaser must supply full details of the delivery address, freight carrier & account number to the Supplier in writing prior to arranging a time for delivery. All costs associated with the delivery or freight carrier will be the sole responsibility of the Purchaser and the Purchaser assumes all risk in the products on and from the point of collection of the products by the delivery or freight carrier from the Supplier.

(See "Item 13/13.2" of Powerdown Terms of Trade)

The Purchaser acknowledges that goods delivered to a courier are outside the Supplier's control and the Supplier will not be liable for any loss, damage, delay or non-delivery of goods contributed to by a third party, to the extent permitted by law, irrespective of whether the delivery or courier was arranged, suggested or promoted by the Supplier.

(See "Item 13/13.3" of Powerdown Terms of Trade)

The Supplier's delivery driver or courier will not accept returns of any goods unless prior arrangements are made with the Supplier.

(See "Item 13/13.7" of Powerdown Terms of Trade)

GOODS RETURNED FOR CREDIT

Subject to the warranty provisions contained in this Agreement, the Supplier may accept or refuse to provide a credit for returned goods in its absolute discretion. Goods will be accepted for credit only under the following conditions:

- (a) All returned goods must be delivered to the Supplier at an address to be nominate by the Supplier at the Purchaser's sole risk, cost and responsibility;
- (b) All returned goods must be accompanied by proof of purchase and a Credit Return Authorisation (CRA) number which must be obtained from the Supplier prior to return of the goods.
Goods returned without a CRA will be returned to the customer at their expense;
- (c) Goods will not be accepted for credit after 30 days from date of purchase. Goods outside this time frame will require prior **written authorisation** from the Powerdown National Sales Manager or Powerdown Regional Sales Manager of the territory in which the goods were purchased and a CRA issued.
- (d) Goods are in a saleable condition, i.e. in original packaging, no damage to goods, nor defective packaging or accessory packages missing.
- (e) Non Stock Items and goods manufactured or supplied for a custom order or which have been modified to suit the Purchaser's application will not be accepted for credit under any circumstances.

(See "Item 14/14.1" of Powerdown Terms of Trade)

PRICE

All goods are sold at the price current at the time of delivery. The price of the goods are at the Suppliers works. Costs and charges for freight and handling at the point of delivery to the Purchaser or the Purchaser's agent are payable by the Purchaser unless otherwise stated on the quote/order form. **NOTE: - Pricing may vary from time to time subject to exchange rate variations and/or material increases outside the control of the Supplier.**

(See "Item 20" of Powerdown Terms of Trade)

CREDIT CLAIMS

It is the responsibility of the Purchaser to carefully inspect the goods immediately they are delivered. Credit Claims will be recognized if made in the first instance by phone within 48 HOURS of receipt, and also in writing within 7 days of delivery. Claims outside this period will be at the absolute discretion of the Supplier, and its decision final and binding on the Purchaser.

(See "Item 22" of Powerdown Terms of Trade)

RETURN OF, OR CANCELLATION OF GOODS ORDERED

In the event the Purchaser elects to return goods or cancel goods on order, the Supplier at its absolute discretion reserves the right to charge a 10% handling fee on the amount involved. Further no return of goods will be accepted without prior approval of the Supplier in writing. All goods returned must be in original condition and packaging and complete in every detail. Goods will only be accepted if the freight is prepaid by the Purchaser.

(See "Item 23" of Powerdown Terms of Trade)

SPECIAL ORDERS

Special orders attract a 50% deposit which will be debited to the Purchaser's account upon receipt of a written order for goods outside our normal stock line, or for goods specifically modified to the Purchaser's requirements. **NOTE: - No return or cancellation of goods will be accepted once the order has commenced.**

(See "Item 24" of Powerdown Terms of Trade)

WARRANTIES and LIMITATION OF LIABILITY

Subject to clause 36, all goods sold carry only such warranty, if any, as is furnished by the manufacturer thereof, or as implied by law. The freight cost for goods returned for warranty consideration is the Purchaser's responsibility. **NOTE: - No warranty work will be completed whilst ever the Purchaser's account is in default of the agreed trading terms.**

(See "Item 25" of Powerdown Terms of Trade)

ADVICE GIVEN BY THE SUPPLIER.

The Purchaser acknowledges that, unless otherwise expressly stated in this Agreement, the Supplier is not an expert or otherwise qualified to give technical or other advice to the Purchaser. Should the Supplier or the Supplier's employees give such advice to the Purchaser at the Purchaser's request or otherwise, the Purchaser acknowledges that such advice, whilst given in good faith, may not be accurate or correct. The Purchaser releases and forever discharges the Supplier in respect of such advice and indemnifies the Supplier against any loss, cost, expense, damage or injury which may be caused or contributed to in reliance upon or otherwise as a result of such advice.

(See "Item 29" of Powerdown Terms of Trade)

COMPONENT SPECIFIC WARRANTIES

The Supplier gives the following limited warranties in respect of parts or products manufactured by the Supplier only:

36.1 SHOCK ABSORBERS

The Supplier warrants all shock absorbers are free from defects in materials or faulty workmanship provided always that the shock absorbers have been correctly installed as recommended by the Supplier. The warranty period for shock absorbers containing mineral oil is 12 months or 150,000 kms whichever comes first from date of purchase. The warranty period for shock absorbers containing Enveero fluid is 24 months or 250,000 kms whichever comes first from date of purchase.

36.2 AIR SPRINGS

The Supplier warrants that all air springs are free from defects in materials and workmanship for a period of 24 months from the date of purchase. This warranty is voided if the air springs are used, or applied, in a manner other than as recommended by the Supplier.

36.3 POLYURETHANE PRODUCTS

These consumables are used as mounts and suspension bushes. The Supplier warrants that these products are free from defects in materials or faulty workmanship provided always that these products have been correctly installed in accordance with the Supplier's recommendations. The warranty period is 3 months from date of purchase, and will not exceed the purchase price total of the products.

36.4 HEIGHT CONTROL VALVES

The Supplier warrants that all height control valves supplied by the Supplier are free from manufacturing faults and material failures for a period of 12 months from date of purchase. Height control valves will not be warranted where the product failure is due to incorrect fitment, (or adjustment), poor maintenance, a contaminated air system or compressor failure.

36.5 No warranty claims will be considered if customer's account is outside our trading terms.

36.6 These warranty conditions do not attempt to exclude, restrict or modify the application of any applicable laws of the Commonwealth, State or Territory which cannot be excluded, restricted or modified including the Australian Consumer Laws.

36.7 The warranties contained in this clause and the Suppliers liability under those warranties are limited by the provisions of clauses 24.2 to 24.5 (inclusive) and do not extend to defects caused or contributed to by accident, misuse, improper installation, neglect or wear and tear.

36.8 No warranty claims will be considered until the complete product, including all packaging and manuals, is returned to the Supplier at an address to be nominated by the Supplier, together with proof of purchase and a completed Warranty Claim Form (in the form provided by the Supplier upon request). The cost of dismantling, removing the product from any associated machinery and returning the product to the Supplier are to be paid by the Purchaser. The Supplier is not liable for any labour or other costs associated with removal or reassembly/ reinstallation of the product the subject of a valid warranty claim.

(See "Item 36" of Powerdown Terms of Trade)

GST

All prices quoted by the Supplier are exclusive of GST. GST will be charged where appropriate, unless a signed exemption form is received by the Supplier in the approved prescribed manner set down by the Australian Taxation Office. Any GST liability incurred as a result of a supply made by the Supplier to the Purchaser must be paid by the Purchaser to the Supplier in addition to, at the same time and in the same manner as the price for the supply.

(See "Item 26" of Powerdown Terms of Trade)

OE SHOCK NUMBER		SUSPENSION			
		☐ MODIFIED ☐ STANDARD			

STEP 1: Check Static Height of shock absorber

This is done from centre of mounting point top to centre of mounting point bottom (refer drawing).

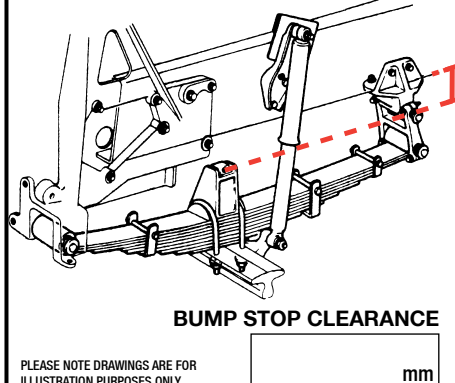

NOTE: Measure when vehicle unloaded and at kerb height.

STEP 2: Check Bump Stop clearance

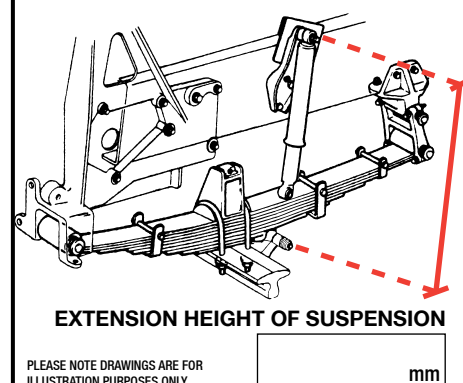

This is done from lower side of rail to top of bump stop (refer drawing).

NOTE: Measure when vehicle unloaded and at kerb height.

STEP 3: Check Full Extension of suspension

This is done by firstly disconnecting lower shock mounts then jack vehicle up, placing stands under rails, lowering suspensions down, then measuring from centre of mounting point to centre of mounting point (refer drawing).

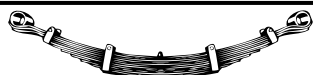

INDICATE BUSHING

☐ STEEL SLEEVED BUSHES INSTALLED ☐ PLAIN RUBBER/URETHANE BUSHES INSTALLED

SUSPENSION TYPE

☐ PARABOLIC

A parabolic spring can be made up of 2 to 3 leaves, with a gap in between each leaf. These leaves do not contact each other so there is no inter leaf friction.

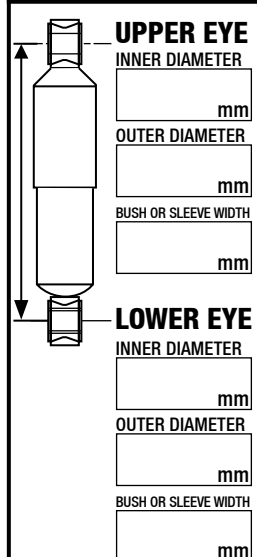

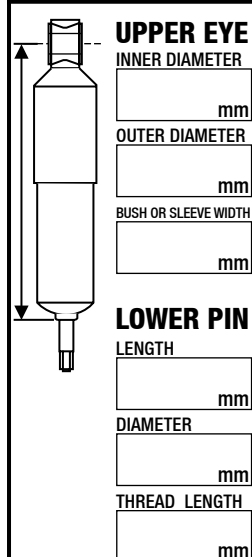

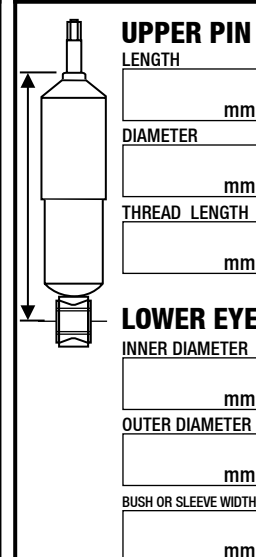

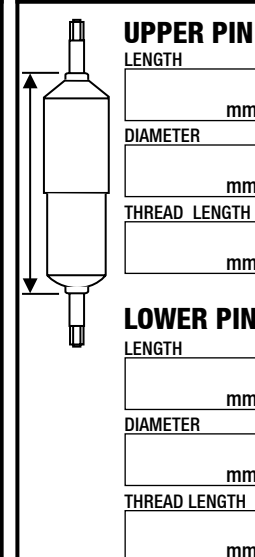

☐ LEAF

A multileaf spring pack can be made up of 5 to 12 leaves depending on the vehicle weight and the maximum load the vehicle is required to carry.

SHOCK WITH AIR SUSPENSION

HOW TO CHECK FOR CORRECT STROKED SHOCK ABSORBER

POWERDOWN

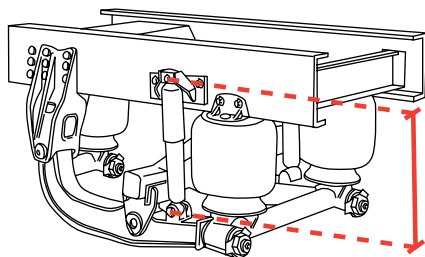

T. +61 2 4949 0000 F. +61 2 4949 0099

DISTRIBUTOR		CONTACT NAME		DATE	
				- -	
PHONE	FAX	SIGNATURE		NOTE: WARRANTY IS VOID IF ALL DETAILS ARE NOT COMPLETED.	
VEHICLE - MAKE & MODEL		VEHICLE - YEAR			
OE SHOCK NUMBER	AIR SUSPENSION MODEL	SUSPENSION			
		☐ MODIFIED ☐ STANDARD			

STEP 1: Check Static Height of shock absorber

Ensure that the truck or trailer is on a level surface. Measure the shock absorber from a static height from mounting point to mounting point at normal inflated ride height (as measured according to suspension manufacturer).

NOTE: Measure when vehicle unloaded and at kerb height.

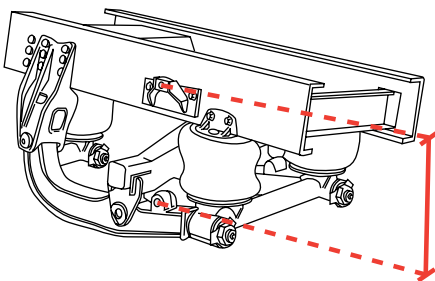

STATIC HEIGHT

PLEASE NOTE DRAWINGS ARE FOR ILLUSTRATION PURPOSES ONLY

 mm

STEP 2: Check Compressed height of shock

Remove the shock absorber from the vehicle. Unbolt the link rod from the axle connection. Pull the valve lever downwards, exhausting all the air from the air bag until the suspension is resting on the bump stop. Measure from mounting point to mounting point.

COMPRESSED HEIGHT

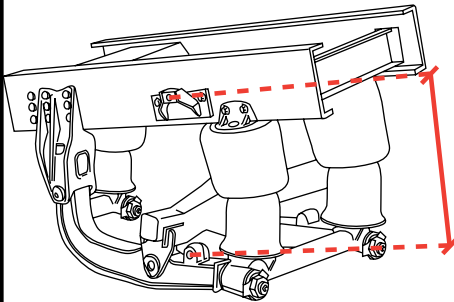

PLEASE NOTE DRAWINGS ARE FOR ILLUSTRATION PURPOSES ONLY

 mm

STEP 3: Check Extended height of shock

Move the height control valve lever upwards, pumping air into the air bag until it is almost fully inflated. Measure from mounting point to mounting point.

Be careful not to fully inflate the air bag as it may tear the bag from the piston.

EXTENDED HEIGHT

PLEASE NOTE DRAWINGS ARE FOR ILLUSTRATION PURPOSES ONLY

 mm
